

# Special Requirements

We pride ourselves in the fact that we offer a little more than just a foundry. We understand the need to be more than just a supplier, and aim to be an integral part of your organisation. Alongside our UK based foundry business, and to compliment our own facility, Batley Foundry has formed strategic partnerships with

overseas suppliers of both ferrous and non ferrous materials. as well as other engineering materials or components. These include stampings, forgings, raw plastic, plastic mouldings, rubbers, gears, and fixtures. All

suppliers are ISO 9002 compliant and quality is guaranteed. All items are inspected and tested to the required specification prior to despatch. We arrange and control the transportation, delivery schedule, importing and storage of these components, prior to delivery to our customers.

By using these partnerships we can supply our customers with more than just castings. We offer a complete supply package for all your engineering needs and help you solve your logistical problems.
